skills

- programming Languages_ Javascript/Typescript, C#, Java
- more Technologies_ HTML, CSS, SQL, MongoDB, PostgreSQL, VS-Code, Git, Github
- frameworks_ React, **Next.js**, .NET, Auth.js, Zod, Drizzle,
- design_ Figma, design laws & gestalt principles, Tailwind and Sass
- else_ shell scripting (bash, zsh, powershell), algorithms and data structures, ISO-OSI Layer Model, UML Diagrams, GraphQL, AWS, GCloud, Scrum, Jira, conventional commits

work and edu

- ▶ currently_ writing my bachelor thesis: impact of rendering strategies in Next.js
- ▶ since 2024_ Peaks & Pies, working as a fullstack webdeveloper on enterprise landing page conversion optimization for multiple international companies with Next.js and Sanity
- ▶ 2023_ semester abroad in Aarhus to improve my social cultural knowledge
- ▶ 2022 to 2024_ Berliner Verkehrsbetriebe (BVG), active development of web applications, to relieve the daily works of more than 15000 coworkers
- ▶ since 2021_ study media informatics at Berliner Hochschule für Technik, german gradesystem: 1,4, US-grade-system: 3,6

projects beside of work

- 10+ study projects from small ones like simple crud applications to a whole buy and sell application with authentication, integrated payment- and realtime messaging system
- set up my own website last year
- started an educational youtube channel called "tobi tackles tech"
- development of a journaling application called "Yournal" for personal use with technologies like Next.js, Clerk or Drizzle
- waki, a flashcard learning app for spaced repetition also with Next.js and newest technologies and optimizations

what else

- languages_ german (native), english (fluent), danish (basics), turkish (basics)
- engagement_ border member, to support the wishes of athletes
- privat_ profesional 100/200-m-sprinter at SC Berlin since 2017, national Top 3

Motivation Letter & About me

Hi,

I wanted to take a moment to introduce myself and give you a better understanding of who I am, what drives me, and how I approach my work. Hopefully, this will give you a clearer picture of my mindset and motivations.

I'm someone who's always aiming to be the best version of myself, whether it's through my work, my learning, or even in sports—track and field keeps me focused and driven. I'm disciplined and purposeful in everything I do, with a strong focus on finding solutions and staying calm under pressure. Stress doesn't faze me; instead, it pushes me to think clearly and stay focused on what matters.

I'm passionate about staying up to date with the newest technologies and love experimenting with them to see how they can make an impact. One area I'm particularly focused on is Next.js, which I explore regularly on my YouTube channel, *Tobi Tackles Tech*. It's a platform where I share insights, tutorials, and lessons learned, helping others in the community while also deepening my own understanding. I'm a firm believer that teaching is one of the best ways to master something.

I'm equally invested in both front-end and back-end development. There's a lot of satisfaction in building solutions that are not only functional but also well-designed. Design, in particular, is important to me—not just from an aesthetic standpoint, but because it enhances user experience and ensures that the product is intuitive and enjoyable to use. As a long-time MacOS fan, I really appreciate good design and try to bring that attention to detail into everything I work on.

At my core, I'm always looking to learn something new every day. Whether it's refining my technical skills or staying on top of industry trends, I thrive on growth and constant improvement. I believe that with discipline, a love for innovation, and a solution-oriented approach, I can make a meaningful contribution wherever I go.

Looking forward to what's next!

Best,
Tobi
